# SPIES TAP NAZI CODE

BY A SPECIAL CORRESPONDENT

**B**RITAIN'S radio spies are at work every night. During the day they work in factories, shops and offices. Colleagues wonder why they never go to cinemas or dances.

But questions are parried with a smile—and silence. Their job isn't one to be talked about.

Home from work, a quick meal, and the hush-hush men unlock the door of a room usually at the top of the house. There, until the small hours, they sit, head-phones on ears, taking down the Morse code messages which fill the air.

To the layman these would be just a meaningless jumble of letters.

But in the hands of code experts they might produce a message of vital importance to our Intelligence Service.

No pay is given to the men who tap the air for these messages.

## Their Reward

They are drawn from the radio enthusiasts who operated their own short-wave transmitters before the war.

"We are glad to serve the country in this way," one of them told me.

"A letter of thanks from headquarters telling us that we have been able to supply some useful information is all the reward we ask."

"Naturally we have no idea of the codes used by German agents."

"But it is a great thrill to feel you might be getting down a message which, decoded, might prove of supreme importance!"
