## Journal Index

This index includes all the journals that have been posted on the CHRS website. Note, the two most recent issues are not yet made available online.

The CHRS Journal has been published since 1975. There are periods when there was no journal editor and consequently no journals were published during those gaps. For example, there is a gap between the years 2000 and 2004, between 2004 and 2008, and again between 2008 until 2012. Unfortunately, the CHRS archive does not have a complete set of older journal issues. Consequently this index and the number of issues posted is not complete. As more older issues become available for scanning, they will be published.
